

BLOXIDE WELDABLE PRIMER

A versatile primer, Bloxide® is a unique formula that can be applied to a wide range of metals preventing the formation of rust and corrosion during extended periods of storage. With enhanced corrosion preventative features, Bloxide eliminates the need to clean metal surfaces before welding, saving time and labour costs during fabrication. Bloxide is completely weldable, also improving the weld quality after application.

Simply apply Bloxide by brush, dip or spray. Standard packaging: 12 oz. aerosol cans, quarts, gallons, 5 gallon pails and 55 gallon drums. Free from lead, sulfur, zinc and other halogens, Bloxide is an excellent primer for a wide range of applications.

Applications:

- Marine and off-shore fabrication.
- All steels, including high tensile, carbon moly and chrome moly.
- Primer for paint and coatings.

Part No	Description
TAB	Bloxide Aero 13oz
TAB-B	Bloxide Gall
