

THERMISHIELD

Heat Shield Gel

THERMISHIELD protects any material from the heat of a blowtorch, allowing a best result of welding or brazing. The heat is not a risk to the materials, THERMISHIELD acts as a heat shield.

- Protect the surfaces in contact with the flame of a welding torch (steel, copper, brass, polystyrene, wood, chalk, plexiglas)
- Stop heat from travelling through most metals during welding, brazing or soldering.
- Prevents from distortion of metals & even plastics caused by the heat of a welding torch.
- Non toxic, Non corrosive, Inflammable
- 0.5 Litre pump pack
