

# TIGMASTER®

## WHIP - EXTENSION POWER CABLES

Air Cooled TIG Torches

57Y01SF Series suits TM9, TM9F, TM9V, TM9FV, TM17, TM17F, TM17V, TM17FV  
46V28 Series suits TM16, TM16F, TM16V, TM16FV, TM26, TM26F, TM26V, TM26FV

57Y01SF Series  
Whip Power Cable Kit  
shown kit includes whip  
power cable and  
insulating sleeve.

These “super flexible” whip-extension power cables add flexibility and manoeuvrability to the standard TIG torch giving the welder more control and ease of use.

Made from a soft non-conductive rubber tube with a durable over braided cover for maximum flexibility. Kink resistance and light weight.

These power cables can be used as a whip lead or as an extension to the existing torch power cable. They simply connect to the torch end of the normal power cable and the connection is protected from damage and electrical shorting with the insulating sleeve supplied in the kits.

Part Number	Description
57Y01SF-6WK	6 ft. Whip Power Cable Kit with Sleeve suits 9, 17 torch series
57Y01SF-12WK	12ft. Extension Power Cable Kit with Sleeve suits 9, 17 torch series
46V28-6WK	6 ft. Whip Power Cable Kit with Heat Shrink Sleeve suits 16, 26 torch series
PCA-4-1	Insulating Sleeve - Silicone Rubber (Used with Whip Cables) suits 9, 17 torch series (57Y01SF)
